

ThinPrint Consolidates Its Mobile Business Activities Under the "Cortado" Brand

The new "Cortado – A Division of ThinPrint" to become central point of contact for mobile business solutions

(Berlin, June 2007) With its products Content Beamer and the Cortado hosting platform, ThinPrint GmbH offers a comprehensive portfolio of solutions for mobile business customers. From free push e-mail (<http://www.cortado.com/free>) for mobile phones to mobile access to company networks: ThinPrint's mobile solutions have long since expanded beyond its initial emphasis on printing. On the other hand, the market for the classic, print-focused ThinPrint .print product palette continues to grow in double digits. In order to provide customers with simple and stringent communication in both areas, ThinPrint is now consolidating all mobile business activities in the newly created Cortado – A Division of ThinPrint.

The Cortado business unit is comprised of two sectors: Online Services and Enterprise Solutions. The Online Services sector operates the well-known Cortado Portal with online services, and the Enterprise Solutions sector is responsible for Content Beamer enterprise solutions. In the course of reorganization, Content Beamer will be renamed in autumn as the Cortado Corporate Server.

"Our goal is to position Cortado as a strong brand in the mobile business solutions sector. No other single provider operating today can offer a similarly extensive range of platform support and functionality as well as enterprise solutions," says Carsten Mickleit, Managing Director of ThinPrint GmbH.
