

Convenient Printing in Modern Thin Client Networks

The print optimization experts at ThinPrint announce a component for terminals with the Windows CE 6.0 operating system.

(Berlin, July 2008) Thin clients with the Windows CE 6.0 operating system run faster, are more stable, and provide better support for modern multimedia applications. The .print Client for Windows CE 6.0, now available from ThinPrint, provides efficient support of print functions.

With a ThinPrint-OEM Partnership, this new client can now be integrated into the hardware of all thin client manufacturers, including leading companies like Wyse, HP and Igel. In addition to improved user-friendliness of the interface, the new client simplifies printer addressing. With just a mouse-click on the new "Detect Now" button, and the system automatically recognizes the names of the connected LPT printers. LPT and USB printers are automatically recognized and assigned to the correct port. USB printing has also been optimized in the new component. You still get the solution's proven features, such as support of bandwidth management and decompression of print data compressed server-side by the .print Engine. For companies with a dedicated print server, ThinPrint's printer virtualization layer ensures that thin clients can also access native printer drivers for locally connected printers. In this case, the native printer driver is located on the dedicated print server.

Simply click on the new "Detect Now" button and the system automatically recognizes the names of the connected printers.

"The new .print Client improves the user experience so dramatically that the thin client user will hardly notice a difference from a desktop computer," says Charlotte Künzell, General Manager of ThinPrint .print. "We're happy that we can now provide our OEM partners with an appropriate print optimization client for their new hardware."

ThinPrint GmbH

ThinPrint specializes in mobile enterprise solutions and printing in distributed network architectures. The company's success is based on its print management solution, ThinPrint .print, which is successfully employed in companies of all sizes in all sectors around the globe. More than 500 major distributors and resellers in over 80 countries sell products made by ThinPrint GmbH. Thanks to numerous partnerships, client components using patent-pending .print technology have been integrated into the terminals, printboxes, PDAs and mobile phones of several leading hardware producers. Strategic partnerships with ThinPrint play a special role in this endeavour, including BlackBerry (RIM), Bluetooth SIG, Citrix Systems, Inc., Fujitsu Siemens Computers, Lexmark International, Inc., Microsoft, Nokia, Orange, Palm, Inc., Sun Microsystems Inc., Symbian Ltd., VMware, Inc. and XPS Software GmbH.
