

ThinPrint announces a new way to centrally manage corporate print environments: .print Management Center

Denver (May 20, 2008) – ThinPrint, manufacturer of the leading print solution for server-based computing architectures, announces .print Management Center.

The new software is designed to work with the .print Engine family, offering centralized control over the entire .print environment from a convenient central location. Using the Citrix XenApp™, application virtualization system the new software streamlines efficiency and productivity for corporate print environments.

“Our new software allows our customers the ability to configure and maintain a print environment, which increases ROI for in-house print management.” says Henning Volkmer, CEO of ThinPrint Inc. “Centralizing IT management is one of the biggest challenges for large corporations or those customers covering large geographic areas, sometimes with offices around the globe.”

The .print Management Software centralizes the entire print environment, including remote clients and servers, with the click of a button. Through the centralization, design and configuration times are greatly reduced, thus decreasing the initial investment needed to benefit from the .print Engine.

The .print Management Center joins the highly successful .print product family helping it add even more value to delivered applications using Citrix XenApp or Citrix XenDesktop™. It can be added to existing .print environments based on version 7.6 of the .print Server Engine.

The software is planned for project release in summer 2008.

ThinPrint Inc.

ThinPrint specializes in optimized print data transmission for distributed networks. ThinPrint's .print technology has established itself as the technological leader in print management software, and is used today in companies of every industry and size in all regions of the world. The application spectrum of the .print technology is widely diversified and provides highly efficient print management in, among others, Terminal Services environments, client/server architectures, SAP environments, web and mobile applications, with Host Printing, and in virtualized server or desktop environments. An extensive sales network with more than 500 qualified distributors and resellers in over 80 countries ensures optimal customer service on location. Additionally, 120 ThinPrint employees at headquarters in Berlin (Germany) as well as at the branch offices in Denver, Colorado (USA); Cleveland, Ohio (USA); and Sydney (Australia) provide for continuous growth. Strategic and OEM partnerships with leading global hardware and software manufacturers allow the ThinPrint .print technology to be used like

no other print management solution – in practically every distributed network environment – with printers, print boxes, and thin clients. ThinPrint's .print technology is compatible with devices from manufacturers such as Hewlett-Packard, Lexmark, Kycera-Mita, Ricoh, SEH, Igel, Wyse, and many more. The most important strategic partnerships with companies include Citrix, Juniper Networks, Microsoft, and VMware. Citrix®, Citrix XenApp™ and Citrix Desktop™ are trademarks of Citrix Systems, Inc. and/or one or more of its subsidiaries, and may be registered in the U.S. Patent and Trademark Office and in other countries. All other trademarks and registered trademarks are property of their respective owners.
